I don't understand what he try to teach and also sir is not audible

I don't understand whatever he teaches like let say ashutosh sir he is very clear about what he says and i feel like he is the best one yet

I don't understand what he teach in class.

Topics are explained very fast.

Best teacher

Good teacher.

Not understand

Concepts are not clear

not able to understand a single word of what he is teaching

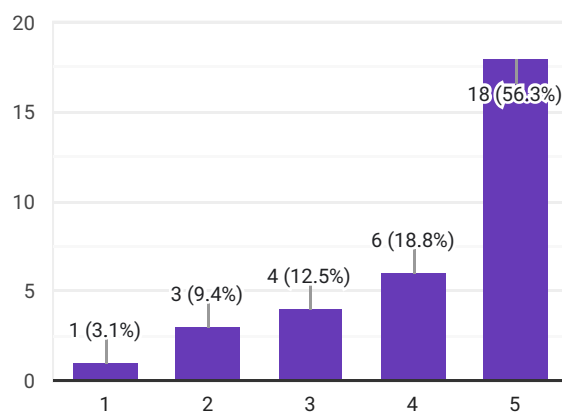

No clarity

Best

Sometime she is understandable but sometimes its just not understandable

I don't understand very well what she teach in class.

Good

Interactive classes, good way of teaching

she is teaching too fast but understandable

She's good, but when students had doubts about tricky questions, she wasn't able to explain them clearly.

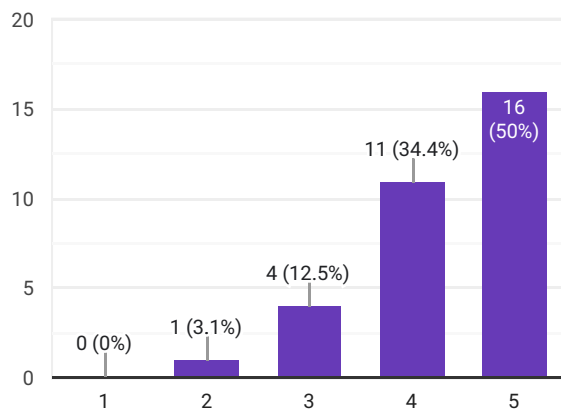

And the question was $x(-t)$ is causal or non causal. But she said it's causal.

He is just perfect . He knows what he is delivering i was very afraid initially but now i feel like he is the best one yet.

He is the best teacher that I have ever seen.

Good

Normal

making notes is the best way of teaching

Mam is nice and teaches very well.

Not yet started

Best

Excellent

okay okay!!

Verilog is very important for us, but the classes are neither interactive nor conducted seriously.

Students Review

List the names of 2-5 classmates who frequently disturb the class or disrupt the flow of the lecture (optional).

He actually disturb the whole class.

Stomping their legs on wooden floor

Disturbs a lot in lectures by laughing, making noises, asking irrelevant questions ,during lectures.Disturbs the flow of teaching by unwanted activities in class like tapping benches and laughing etc.

no such type of people in class

He keeps stomping his feet loudly during the ADC classes, which creates a lot of disturbance and distracts everyone in the class.

Class Room Review

Mention your problem (optional).

20 responses

Cleanliness

There is no AC, due to which the classroom becomes very hot

Proper ventilation is not available

Benches are not comfortable

Overall classroom environment is uncomfortable

If you say for my opinion so plz upgrade the fan they are literally slowly

AC please !!!

I want air conditioner.

Switches should be more of we had to carry laptop for some work using laptop without plugging them shortens the life of battery and fans don't work properly they are very slow in this condition focusing on what thought becomes difficult due to the humidity in the class.

Cleanliness and fan is not working properly

Excessive heat

I am not understand teacher not proper understanding my problem

Please keep our classroom clean. Dirtiness creates an unhealthy environment.

We need a room freshener in the classroom because the staff washroom is located just outside the class, and a strong unpleasant smell often enters the classroom

Average cleaning

Desks are always found dusty, specially the space under bench for placing books and bags.

The classroom feels very hot. Please install ACs or some good quality fans.

The classroom is not maintained properly. Cleanliness is often poor, and the classroom remains dirty. The lighting is also inadequate, making the classroom quite dark during lectures. Most of the fans do not work properly and rotate very slowly, causing discomfort. The windows are in poor condition and have been painted green instead of installing proper curtains, which does not solve the sunlight issue. Additionally, the classroom has very poor ventilation, making it hot and humid. Kindly improve the cleanliness, repair the lights and fans

fix the windows, provide proper curtains if needed, and improve ventilation for a better learning environment.

Our classroom desks are not clean; there is dust everywhere.

Without air conditioning, the classroom becomes extremely hot and uncomfortable.

There is also a bad smell coming from the washroom, which makes it difficult to sit in the classroom.

It feels hot in the classroom

our class is at 5th floor due to which it is really hot i know college cannot provide ac's in classroom but i think an exhaust fan or a couple of exhaust fan will be good in our class to take out the heat of the classroom

Heat wave

Final 🎉

Any suggestion? (optional)

13 responses

No

These issues should be addressed and improved, rather than being ignored

Yes !! We want a ac in our classroom

Please change rahul sir i really request.

Teacher of Analog and digital communication should be change.

Plss provide more switches and make fans work properly.

AC pls or change the capacitor of fans atleast it will run fast

Kindly improve the classroom infrastructure and maintenance to create a proper learning environment.

Improve class structure

no

Take student feedback regularly and implement necessary improvements.
Ensure all faculty teach according to the syllabus and complete it on time.
